#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

1) Responsive to communication(s) filed on 4/16/09.  
 2a) This action is FINAL.                    2b) This action is non-final.  
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 16, 2009 has been entered.
  
2. Claims 1-4,7,8 and 11 are pending. Claims 5,6,9,10,12 and 13 have been cancelled. Claims 1 and 7 have been amended.
  
3. The rejection of claims 1-7 and 9-13 under 35 U.S.C. 103(a) as being unpatentable over Tzikas et al (US 6,160,101) in view of Eichhorn (US 6,281,340) is withdrawn in view of applicant's amendments.
  
4. The rejection of claim 8 under 35 U.S.C. 103(a) as being unpatentable over Tzikas et al (US 6,160,101) in view of Eichhorn (US 6,281,340) in further view of Tzikas et al (WO 00/06652) is withdrawn in view of applicant's amendments.
  
5. Claims 1 and 8 stand provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of copending

Application No. 10/551,319 for the reasons set forth in the office action dated May 13, 2008. Applicant's have not argued this rejection.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1-4,7,8 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tzikas et al (US 6,160,101) in view of Tzikas et al (WO 00/06652). The Tzikas '652 document is not in English so the English equivalent document, US 6,537,332, is being relied upon for citation purposes.

Tzikas et al '101 teach a reactive dye compositions for dyeing and printing fiber materials containing hydroxyl groups and nitrogen (column 25, lines 31-32) comprising dyes having at least one structural unit of formula (1), wherein D1 or D2 is a radical of a diazo component of the benzene or naphthalene series (column 2; column 3, lines 5-15; column 46, lines 45-50, compound of formula 102; fiber-reactive reactive group is  $-SO_2-\beta$ sulfatoethyl). Tzikas et al '101 teach reactive dyes having at least one structural unit of the formula set forth above and that such dyes can be obtained as mixtures (column 24, lines 36-42). Tzikas '101 et al. teach applying the compositions in the form of aqueous compositions and printing with them, which meets the lenition of aqueous ink (column 25, lines 45-60).

Tzikas '101 et al do not teach the reactive dye of formula (2) or (2a).

Tzikas et al. '332 teach dyeing and printing hydroxyl or nitrogen containing fiber materials (column 9, lines 10-25) with dyes of formula (2a) (columns 23 and 24, formula (107)) and dyes of formula (8) (abstract).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the dyes of Tzikas '101 by incorporating the dyes taught by Tzikas '332 because both references are directed towards effectively dyeing similar textiles for the benefits of high degrees of fixing and light/wash fastness. It is *prima facie* obvious to combine two compositions each of which is taught by the prior art to be useful for the same purpose, in order to form a third composition to be used for the very same purpose.... [T]he idea of combining them flows logically from their having been individually taught in the prior art. *In re Kerkhoven*, 626 F.2d 846, 850, 205 USPQ 1069, 1072 (CCPA 1980). See MPEP 2144.06.
